

# Consortium PSYCHIATRICUM

APPENDIX. SUPPLEMENTARY DATA TO:  
Tatiana Meshkova, Olga Mitina, Roza Aleksandrova.

Risk Factors of Disordered Eating in Adolescent Girls from a Community Sample:  
A Multidimensional Approach.

Consortium Psychiatricum 2023; published online June 2023.  
DOI: [10.17816/CP6132](https://doi.org/10.17816/CP6132).

This appendix is a part of the original submission.  
The appendix is posted as it was supplied by the authors.

**Table S1. Risk Factors of Eating Disorder (RFED) Questionnaire: Item scoring**

	<b>In English</b>	<b>True</b>	<b>Somewhat true</b>	<b>False</b>
1	I get very upset when my work contains errors	3	2	1
2	I think my family underestimates me	3	2	1
3	Sometimes I can't tell if I'm hungry or upset	3	2	1
4	I have mood swings	3	2	1
5	I think I can't be happy until I lose weight	3	2	1
6	I would like to be an honors-student	3	2	1
7	I worry about my future	3	2	1
8	I feel like I'm worse than others	3	2	1
9	I feel like I can't achieve much in life	3	2	1
10	I am afraid of doing something wrong because I will be judged in the family	3	2	1
11	I am often depressed	3	2	1
12	Weight affects my well-being, mood, self-esteem, and self-confidence	3	2	1
13	I strive for the ideal to live up to the hopes of my parents	3	2	1
14	Sometimes I feel tension that I can't explain	3	2	1
15	I often experience anxiety	3	2	1
16	I don't like my body	3	2	1
17	It seems to me that in childhood I lacked love and attention.	3	2	1
18	I watch my weight, weigh myself regularly	3	2	1
19	I always worry long and hard about what is happening to me	3	2	1
20	I would like to experience the thrill even at the risk of my life (for example, skydiving)	3	2	1
21	If I make a mistake, I always mentally "scroll" the situation for a long time	3	2	1
22	I love everything to be perfect	3	2	1
23	Sometimes I have feelings that I can't define	3	2	1
24	I try not to advertise my weight	3	2	1
25	I am not satisfied with the shape of my body	3	2	1
26	I like to take risks, it excites and agitates	3	2	1
27	I often cry	3	2	1
28	I have an ugly figure	3	2	1
29	I have incomprehensible physical sensations that I cannot explain	3	2	1
30	I am dissatisfied with my weight	3	2	1
31	My successes at home are hardly encouraged	3	2	1
32	I feel rejected by my family	3	2	1
33	I get very excited when I have to answer a lesson	3	2	1
34	My weight is unstable, it often fluctuates	3	2	1
35	I am too patronized and controlled in the family	3	2	1
36	I was brought up in strictness	3	2	1
37	In the family, I am often scolded for missteps and shortcomings	3	2	1
38	I often get annoyed over trifles	3	2	1
39	I often have a state of apathy, unwillingness to do anything	3	2	1
40	I often feel stressed	3	2	1
41	Often I can't figure out how I feel	3	2	1
42	I'm afraid to do something wrong	3	2	1
43	I don't see my place in the future	3	2	1
44	I like to do any things with the highest quality	3	2	1
45	It seems to me that my parents forbade me too much	3	2	1
46	I envy the looks of other girls	3	2	1

	In English	True	Somewhat true	False
47	I find it difficult to find the right words for my feelings	3	2	1
48	I'm afraid to gain weight	3	2	1
49	I don't like myself	3	2	1
50	If I was offered a weak drug, I would risk trying	3	2	1
51	I'm afraid fail with the school curriculum	3	2	1
52	I try to satisfy all demands that adults place on me	3	2	1
53	I want to lose weight	3	2	1
54	I don't believe in myself	3	2	1
55	I like to decorate my body with tattoos, piercings and scars	3	2	1

Note: The subscale scores are computed by summing all items assigned to these particular scales:

Perfectionism: 1, 6, 10, 13, 22, 44, 52

Alexithymia: 3, 14, 23, 29, 41, 47

Self-distrust: 8, 9, 42, 43, 49, 51, 54

Negative emotionality: 4, 7, 11, 15, 19, 21, 27, 33, 38, 39, 40

Risk behavior: 20, 26, 50, 55

Body dissatisfaction: 16, 25, 28, 46

Weight preoccupation: 5, 12, 18, 24, 30, 34, 48, 53

Family relationship dissatisfaction: 2, 17, 31, 32, 35, 36, 37, 45

Note: All regression coefficients are significant at p-value <0.05

**Figure S1. The Dembo-Rubinshtein Method for Measuring Self-Esteem.**

*Note:* Respondents are asked to make a single mark on each 100-mm vertical line in several scales indicating their own idea about the level of some particular individual trait (see figure). We used the following scales: health, mind, creativity, memory, appearance, self-belief, will, determined character, authority among peers, level of physical fitness, happiness.

The standard instruction sounds like this (on the “health” working scale): “Let’s assume that all the people of the world are located on this line: here at the top (show) the healthiest, and below (show) the sickest. Now put a mark – a line (—) where you think you fit for health reasons. The same instruction applies to all other scales.

Then the height of the appropriate segment was measured. In accordance with this, the answers of the respondents receive a quantitative characteristic in points (for example, 72 mm = 72 points.)
